

### **Enrichment Statement for Geography**

At West Byfleet Junior School, many enrichment opportunities take place beyond the core offer of Geography in our school. The following take place ensuring that Geography is a strong area of the curriculum at WBJS:

- Opportunities for orienteering in our school with our own orienteering course as well as on residential trips such as at Hindleap Warren
- Inter school general knowledge quizzes with children developing expertise in geographical knowledge
- Fieldwork opportunities throughout the school including surveys, using map skills, river studies and so on
- Linking geography to other areas of the curriculum, for example where in the world different stories have come from; Where historical events have taken place; links relating to RE, news events, personal experiences etc.
